HW #9

1. Cost

- a. 2sumslow = $O(N^2)$ or quadratic
- b. 2sumfast = $O(N \ln(n))$ or linearithmic
- c. Threesumslow = $O(N^3)$ or cubic
- d. Threesumfast = $O(N^2 \log(N))$ I guess this would be quadrithmic.

2. I just included them on the spreadsheet.
